

FACTS ABOUT ANTS

There are more than 10,000 known ant species around the world.¹ Estimates suggest there are over

10 quadrillion
ants alive at any one time.²

Ant can carry

more than 50x
their own weight³

Ants communicate with one another using **chemicals**

to **alert**
each other to

danger

and **food**
sources¹

SIGNS OF ANTS

Live ants - spotting live ants crawling around your property and near areas which food is prepared.

Pathways - finding evidence of an ants nest is a clear sign. These can look like small pile of soil or dirt.
