

THE HIDDEN COSTS OF PEST DISRUPTION

Pest issues are disruptive to your business. Have you ever thought about what they are truly costing you?

The disruption cycle in traditional pest control

To do it well, traditional pest control has always been an intensive service – but it can also be disruptive.

From zero to out of control – quickly

Left unchecked, both mice and rats can explode to a population of hundreds in a handful of weeks.

A trail of danger and destruction

As they move through your business, rodents can spread dangerous bacteria and leave danger and damage in their wake.

Pest control redesigned to stop rodents in their tracks

Rentokil has blended integrated pest management with technology for faster problem resolution and increased efficacy.

MEET THE PESTCONNECT PORTFOLIO

- Remote digital rodent monitoring
